FOR IMMEDIATE RELEASE

APEX Analytix among Fastest Growing Firms in the Triad

GREENSBORO, N.C. – **September 23, 2011** – Today APEX Analytix announced that it has been named one of the 50 fastest-growing, privately held companies in the Triad by *The Business Journal of the Greater Triad Area*. The company is ranked 18th based on a formula that weighs both revenues and percentage growth between 2008 and 2010.

APEX Analytix is a global leader in software and services to safeguard disbursements, identify fraud and improve performance across the procure-to-pay cycle. Its clients collectively contribute an estimated \$4.5 trillion to the U.S. economy. APEX realized significant growth in all operational areas, including audit services and the sale of the company's industry-leading software, FirstStrike®. New contracts, expanded contracts and renewals were especially strong among Global 1000 and Fortune 500 firms.

To drive growth during the three-year period considered by *The Business Journal*, APEX Analytix made significant investments in new product development, sales and marketing. It also launched a new centralized Project Management Office to accelerate service delivery.

"With a strong team of associates in our Greensboro headquarters, and an expanding business in Europe and all regions of the world, our business philosophy is consistent: continuous improvement in delivery of continuous value to our clients," says Steve Yurko, CEO of APEX Analytix. "We are partnering with our clients in global accounts payable, financial shared services and procure-to-pay organizations in ways that are completely transforming the efficiency, effectiveness and cash impact on their businesses. The potential is limitless for our clients locally and worldwide."

APEX Analytix and other Fast 50 companies are featured in a special edition of *The Business Journal* issued today. The rankings were announced during a gala event at N.C.

A&T State University's Alumni-Foundation Events Center hosted by *The Business Journal*, Smith Leonard and Wells Fargo.
